OBJECTIVE

Full-Stack Developer specializing in the PERN stack and responsive web applications. Passionate about scalable systems, performance optimization, and user-centric design.

PROFESSIONAL SUMMARY

Dedicated Full-Stack Developer currently pursuing an MCA with hands-on experience building web applications using PostgreSQL, Express.js, React.js, and Node.js. Proven ability to deploy full-stack projects with manual and OAuth authentication in production environments.

Experienced in Laravel-based systems and structuring complex user role architectures.

Demonstrated strong organizational and leadership skills by coordinating placement activities and managing large-scale college networking events.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, C.
- **Frameworks & Web Tech:** Express JS, Node JS, React JS, Laravel.
- **Databases:** PostgreSQL (Supabase, Neon.tech).
- **Deployment & Tools:** Render, Git & GitHub.

PROFESSIONAL DEVELOPMENT (IN PROGRESS)

- **Front-End Development:** Deepening expertise in React.js, focusing on advanced component lifecycle, state management, and custom hooks.

EXPERIENCE

Job Title: Placement Coordinator & Class Representative

Organization: IIPC, LJ University, Ahmedabad

Duration: 2025 – Present

- Coordinated placement activities, facilitated student communication, and managed recruiter interactions.

- Spearheaded the organization and logistical planning of the university's HR Summit, coordinating networking games and event themes for 500 industry professionals.

ACADEMIC & PERSONAL PROJECTS

Project Title: Cafe Management System

Technology Stack: Laravel, PHP

Live Demo: <https://cafe-management-system-a67y.onrender.com/>

- Engineered a comprehensive web application for cafe operations using Laravel.
- Architected a multi-tier authorization system supporting three distinct user roles (Admin, Owner, and Staff) with custom access constraints and dashboards.

Project Title: Personal Expense Tracker

Technology Stack: Node.js, Express.js, PostgreSQL (Supabase), EJS

Live Demo: <https://college-expense-app.onrender.com>

- Built a full-stack expense tracking system with manual and Google OAuth authentication.
- Implemented role-based admin access and deployed the application on Render with a live production database.

Project Title: Skin Care Hub

Technology Stack: PERN Stack (PostgreSQL, Express.js, React.js, Node.js)

- Developed a location-based utility web application designed to provide accessible skincare advice.

Project Title: Railway Ticket Reservation and Management System

Technology Stack: C

- Engineered the core logic and underlying data structures for a comprehensive ticket reservation system as a collaborative first-semester MCA project.
